I am writing because I am vehemently opposed to the Northern Pass project. And for a whole host of reasons, including the environmental destruction caused by it and the blemish on the natural beauty of our state. Also, the economic loss for small businesses, and threats to tourism, which provides a lot of money for our state. The towers are ugly and I'm pretty sure most of the power will end up going outside of New Hampshire to places like Massachusetts and Connecticut.

Put an end to the entire notion of the Northern Pass project once and for all. No one wants it here!
