I am against the Northern Pass Project for the following reasons:

1. Little to no economic benefit or value to residents of the State of NH.
2. A visual scar on the landscape, which would adversely affect our tourism industry, not to mention our rural way of life.
3. NEP likely did not spend enough time looking for alternatives before embarking on the Northern Pass project; I suspect because they were looking for the most direct, least expensive route for the lines.
