I would like to register a strong NO for this project. We live virtually in the path of the proposed line and would have to drive under it every time we leave our house. The tall towers scar the landscape, will cut the resale value of our house by several hundred thousand dollars, and pollute the air.

If the line must be built please insist that it be buried all along the route.

Better yet, suggest this project be combined with one using another route.

Don't be hoodwinked by this proposal.
