Eleven years ago, my husband and I chose to purchase our 5 acres of land to build our home and raise our family. We chose a beautiful parcel along the Pemi on a classified scenic road. Blood, sweat, tears, and joy were involved in the building of our home; we cleared the land and built the house entirely on our own. We are raising two young daughters in this rural setting so they will grow up with an appreciation of nature and will be driven to protect New Hampshire's wilderness. If the Northern Pass comes through New Hampshire as is currently planned, it will cross our road, as well as the Pemi, just a short distance from our home. This will force us to have to move as it opposes all that we worked so hard for while creating a life for our family. I am a New Hampshire school teacher and my husband is a carpenter. On our salaries, and in our late forties with our children well established at their school and in their community, it will be near impossible to recreate the home we worked so hard to develop. PLEASE OPPOSE the NORTHERN PASS for New Hampshire's children, the beauty and wildlife of the state, and well being of families choosing to live in and support the rural communities of New Hampshire. The project, if it passes, will be the downfall of the state. Thank you for your consideration in working against the Northern Pass.
