Subject: bury northern pass on i-93 -SEC
To: burynorthernpass@gmail.com

Attention SEC,

My Reason for writing this is one of the locations NP wants to put in lines is right in front of my home on Rte #116 church st last summer when they were digging up spots they dug up a area that is directly connected to our town water line , the Maine line to many homes in neighborhood , who in their right mind would consider such a tragedy , mixing electrical lines and water lines ????

These Lines freeze up alot in cold weather which involves reopening and they want to put electrical lines there ???

Never mind the chemical Poison we would endure to our water, and the fact that WE who are stuck now with EVERSOURCE for our electrical source will end up paying in our electrical bills for this project !!!!!

NO THANKS NORTHERN PASS

NO THANKS AT ALL !!!!

Leave the North country as it is beautiful & clean as God intended..

Sincerely Chris Macaulay Church st Franconia NH resident
