The Northern Pass Project will cause serious economic loss in our town (Franconia) as stores will not be accessible on route 18 for long periods of time during work. It seems very likely that there will be environmental harm and possible human danger with those powerful cables under our roads near houses. There is also environmental danger caused by the chemicals which are being used in this whole process. As a member of the Board of Directors of the Franconia Heritage Museum it is alarming to think of the lack of tourism and visitors which will occur as a result of the work in town.

his process does not make any sense when there are other less expensive plans to transfer the energy on already approved rights of way in VT and NH.

Thank you.
