The time for this dinosaurs is over. NH does not need to host a scar such as this for another states power needs. Needs can be had by these states through wind and solar right in their states. The only thing I can see as a benefit of Northern Pass is to line the pockets of the investors of Northern Pass. I for one do not think the impact to/on the state of NH is worth it. I recommend that the SEC deny the Northern Pass transmission line. from ever going through the state of NH. These representatives of Northern Pass have constantly lied about what and how this line will impact our great state of NH. Only money is the motivator here. Not concern for the environment or NH citizens. I say enough is enough.
