Please do NOT approve the Northern Pass project. New Hampshire's scenic beauty is one of our greatest resources, and the towers erected would have a significant negative impact, without nearly enough demonstrated benefit to compensate. Job creation would be temporary and has been overstated by counting a 2-year job as two jobs. We don't need the power; we would serve as a pass-through, yet the costs would burden NH ratepayers. Thank you for protecting New Hampshire from being used in this way.
