**Subject:** Northern Pass

I hope this is not too late to add to the “Nay” list. I take great pride in being a resident of our Capitol City, and was thrilled with the rework of our downtown area. The one thing that has always concerned me are the existing electrical towers visible from I-93 and looking toward the state house. I have always hoped we would clean that area up. Instead we are considering the possibility of making things worse. This is the state capitol, not a working waterfront district. We need to stop the horrible destruction and instead continue the cleanup. Please do not allow Northern Pass to come through Concord., or if it must, then bury the cables.

Al
