Southern NH has essentially become Mass North. Urban sprawl keeps traveling further and further northward and doing things do take away from its natural beauty and make it more urban is not in the best interests of the area or for NH. I came to NH from Mass of escape the urban sprawl. To be in a place with extensive forests and nature and just exposure to country life. Please do not take away from that. There is a reason NH is consistently voted one of the best places to live in the US...Because it is so beautiful. Don't destroy that please
