### CommenterWords

I am very disturbed by the project in general, and resent the fact that the report that was originally presented, was so misleading. NH is a state that suffers from very high energy costs, and yet, we will not benefit from this transmission line. The short term affects of this project, increased labor use and money spent in the state to support construction, are far outweighed by the negative impact to our beautiful state.

Put the lines underground, and that would change my view.
