Please Stop the Northern Pass Project!

This is not needed or wanted. It has been going on for 7 years now, it is very clear the people of NH.

DO NOT WANT THIS! The electricity is not needed in NH, we already export 30% that is produced. NH is out state not Eveready (owned by Conn) or Hydro Quebec (a foreign country). We should have the right to decide on what happens. This is all about money.

Northern Pass is not the only option to meet the so called energy crisis. Other routes should be explored. National Grid will go down existing corridors without disturbing the environment.

There is no reason to destroy NH's beautiful landscape. We do not want NH to be destroyed by miles of towers, compromising our land forever. If you allow this to go thru, there is no turning back, our state will be scarred forever.

Destroy our landscape for private enterprise and a foreign country to fill their pockets, NO

Stop Northern Pass Now
and go for the NO Action alternative!
Thank you & do the right thing

Sincerely
Holly Gray
