Subject: Extend Northern Pass Deadline

Hello Pamela,

My name is Paul Allard, and I am the Chief Operating Officer, and soon to be partner, of a small biotech company in Gilford NH. We are Lakeside Life Science. I am writing to you because I am a soon to be small business owner, and NH resident, who is very anti-northern pass. My company runs several refrigerators and some laboratory equipment, and do require a fair amount of electricity. And as we grow the need for many more refrigerators, will grow, as will our need for more power to run them. Still I would prefer to pay more for my electric costs, than see, the state that I love so dearly, destroyed by a greedy power company, who cares *nothing* for our state. Now, I understand that most people go into government jobs and civil service because of the kickbacks they get from corporations such as Eversource and Hydro-Quebec. God knows in the state of New Hampshire government workers aren't getting paid a ton of money. I just hope that this time, the desire to serve the people of NH, and not destroy the beautiful state in which we live, wins out over the potential financial gains for the very few people in positions of power who are paid to say yes. I say **NO TO NORTHERN PASS.**

Also, I would like to be added to the list of people attending the SEC hearings to speak against northern pass.

Thank you for your time.

Kind Regards,

Paul
