I owe a home directly across from the proposed pathway of the northern pass. I am adamantly opposed to the northern pass project. I think it is a short sighted, outdated plan. The jobs will not last but the negative environmental impact will. Get real, its time for Solar and other renewable energy sources. The Snow Pond Rd area of northeast Concord New Hampshire is heavily wooded and surrounded by conservation land with the near by Oak Hill trails off of Shaker Road. These areas are rich with wildlife and the hiking trails on Oak Hill provide fantastic views of Mt. Kearsarge and Merrimack river valley area. The northern pass power line towers would negatively impact my lifestyle and the lifestyle of the residents of this area who live here for the beautiful connection with nature that this area of Concord provides. I would be able to see the power lines from my house and front yard as they are proposed to pass through the existing corridor across the street and behind my neighbors house. Seeing the Northern Pass towers and power lines would negatively impact my quality of life on a daily basis. I do not want the northern pass coming through my neighborhood. I am also greatly concerned about the medical and health impacts of these towers and lines being placed so close to my home. I have three young children, all in elementary school, and I don't want their health or quality of life negatively affected by the northern pass. I am also concerned that these towers will dramatically lower the real estate equity and value of my home. I live in northeast Concord for its rural beauty. New Hampshire is a naturally beautiful state and the northern pass towers would ruin New Hampshire's natural beauty. The towers would directly block the view of Mt. Kearsarge from the vista way trail in the Oak Hill trail system which impacts the thousands of Concord residents and travelers that hike those trails on a daily basis. No, No, No, as a long time resident of Concord who has attended and has taught in Concord schools, I am emphatically opposed to the Northern Pass.
