Subject: THE NORTHERN PASS.
Date: Friday, August 18, 2017 7:44:06 AM

The Northern Pass is quite simply a physical, visual assault on one of America's scenic treasures....but that, is just the beginning...New Hampshire will NOT be the beneficiary of any 'savings'. Where is a contract, stipulating amounts to be saved in energy costs to NH residents? Where is the guarantee that those involved with The Northern Pass will guarantee that NO harm will arise to NH residents from tower emissions, and that cancers possibly caused from said towers, will indeed be covered and insured by companies affiliated with TNP. Canada, will be the greatest recipient of 'energy' This is not a secret...as The North American Union looms. I Firmly believe that we must protect and defend our extraordinary State of NH, and not allow it to become an instrument/victim to fulfill the greed, carelessness and disrespect of the few who will reap the rewards of this unimaginable betrayal. Those who are promised jobs, must take a step back to examine the long term effects of poorly made decisions. Haven't we sacrificed enough?...as government grows, and freedoms dwindle? Take a stand for the great little State of New Hampshire, and for all future generations, who will suffer the impact of exceedingly poor decisions, made today.

If you are not familiar with The North American Union, Please google the documentation for The NAU...it is truly an insidious plan to disenfranchise Americans from our own Country. DO YOUR RESEARCH, PLEASE. NO TO THE NORTHERN PASS. GOD BLESS, AND THANK YOU FOR YOUR TIME.
