---

Unfortunately all your doing to stop the Northern Pass is only delaying the project. This will only make the costs skyrocket and it will still go through. If you want a comparison look at how long the protesters delayed the Seabrook Nuclear plant. The Northern Pass will be the same way. All this will just make it so we can pay unbelievable amounts of money to the Utility and they do get their money. Just watch and you will see. People still want to have lights and power and enjoy the TV. The Northern Pass will bring power into NH and provide all of the power to the power grid.
