After several years of OVERWHELMING opposition to this project, it is very clear. The people of this state DO NOT want to permanently disfigure our state for SO VERY LITTLE gain.
This project needs to be once and for allSHUT DOWN!

If the members of the SEC have never been to the north country.....I URGE you to go. Spend some time there maybe take a long ATV ride.

Think about what these transmission lines will look like, strapped across the state we live in and love.

An absolutely, incredibly BAD idea, which we won't be able to undo!
