I object to the northern pass project with the core understanding that there is not any benefit to the state of N.H. The overwhelming benefits will be seen by outlier states while N.H. will be scarred by the transmission towers and lines.

Local support is microscopic and disruption to businesses and the tourism industry will be devastating. As a lifelong N.H. resident and frequent traveler to the Great North Woods, Cannon Mt., Franconia State Park, I know the area very well and object to the suggestion that there will be no consequences to the value and views of The Sate of N.H.

Respectfully,

James Stevenson
