We have had a seasonal camp on Hall Stream Rd in Pittsburg for 14 years. We enjoy the quiet beauty of the landscape among other things. That is why we go there. Our daughter and her family also have a camp nearby. Many members of our family as well as friends come to visit and remark of the beauty of the mountains and hills of northern NH. Will people continue to visit if the beautiful vistas are gone?
So many of us who are residents of NH are greatly concerned about how the people of the north country will be adversely affected by this unnecessary project. The people of NH do not need this project that bad. Let Hydro-Quebec, Eversource find another way.
It seems incredibly unjust for a Canadian government-run energy cooperation be allowed to have permission to negatively impact not just on the landscape, but to the ecosystem as well.
Please remember that NH is referred to as "Scenic NH". I would hate to see it referred to as "Scarred NH".
Vote NO, please.
Thank you.
