Dear Pamela Monroe,

Why is there so much opposition?

All of us want to see people employed, need electricity, and would like more money coming into NH, but this has been a lousy plan from the start. The long-term price isn't worth the short-term payoff, and it seems POWER and MONEY are trying to silence the people of New Hampshire. Don't let deception and corruption win this fight, and our future generations lose.

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission will also not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Please do the right thing and don't be bullied or paid off!
