Here is letter sent to WMNFS regarding this project. Why should a federal agency be weighing in on what should be a state level issue? I have not received a response, yet.

Dear Ms. Lemieux

Your decision to approve construction of the Northern Pass project is disappointing.

You claim your decision is based on public input. How can this be? A recently published survey shows an overwhelming majority of those surveyed are against the Northern Pass project. BY AN 11:1 RATIO!

Please provide the source for your claims and, further, expand on your concern about managing the WMNF.

Thank you. A concerned resident of Thornton NH.
