Dear Pamela Monroe,

As a resident of New Hampshire I strongly urge the SEC to reject Northern Pass's certificate 100% and without compromise.

I've seen no evidence of any benefit to any resident of NH. However, the destruction and construction will effectively destroy forever much of what is best about our State. Especially here in Northern NH, this is not an easy place to live. We need the pristine and glorious views, unencumbered by the huge towers proposed in order to make it --this speaks to the center of our being as well as the economics of a tourist-driven area.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

Please, I implore you to reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Amy Delventhal
