Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

As a resident of the Great North Woods, I am aware of how much of our economy is dependent on tourism. I firmly believe that these towers will detract from our beautiful landscape/scenery and deter thousands of folks from down country from visiting our area. And, may I say, not just folks from down country. I love this area called the Great North Woods and the beautiful state of New Hampshire. We don't want or need anything that will detract from its natural beauty. There are other alternatives!!

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Ann Florio
