Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

There is another project going in in Vermont which should lessen any necessity for the project in NH. Vermont has required that lines are underground so as to not destroy the identity and beauty of Vermont. I think it's a travesty to destroy NH's pristine beauty and opportunities for tourism by building such a thing. Why would we defile our state for homeowners, business owners, and tourists for something so iffy in value and dependability? Why jump onto it when the company can't even get its facts straight? Preserve us from that, please. I love my state and wish to preserve its environment; don't let them destroy our paradise.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Linda Sharpe
