Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

The plan for Northern Pass uses outdated technology - remember what happened to the towers during the sleet storm in Quebec and northern NH??? If there is such a project, the entire thing MUST be buried. It will not provide permanent employment in NH and NH won't get any of the electricity. NP has been a bad idea since its inception. Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Susan Brown
