Dear Pamela Monroe,

i totally feel that the northern pass is a horrible and totally unnecessary project for NH. The current route, part of which goes thru rt 116, 112 et will destroy a very scenic route, as well as a long lasting business (the lost river campground, is just one). What about beaver pond and it's pristine beauty? the Appalachian trail? The moose population which is quite decent in that area (trust me I drive thru there every night and see bulls, cows and calves.) It's also part of the NF..does that make a difference? Or is it just greed and the desire to build those lines for more power to other states? NO LINES. NO NORTHERN PASS. NO NEED FOR NH. PERIOD.

This project serves no good for the state, except for the "benefit" of hiring workers. For the limit of construction. And then those positions are gone. SO you have more unemployment as well as lost income from the small companies whose revenue has been impacted by the building of the pass. This is a double whammy which many may not be able to rebound from. Campers aren't going to want to camp in an active construction site..both at Lost River Valley and at Wildwood, the NF campground. I'm guessing the tourist \$\$ in no longer a concern or of importance to the state government?

There is NO NEED FOR THE NORTHERN PASS. IT DOES NOT OFFER THE STATE POWER. IT RUINS THE STATE. OFFER IT NO SUPPORT. PERIOD. I DOUBT OUR FUTURE GENERATIONS WOULD APPROVE OF THIS HORRIBLE DECISION.

Sincerely,
lois lema
