September 22, 2017

Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

The SEC, representing the government therefore the people, continue to ignore the plea by the overwhelming majority of residents that we don't want Northern Pass, don't see the benefit to our state and see clear alternatives to the current proposal, e.g. bury the lines, use the coastline as is being done for other energy projects targeted to deliver energy south of us.

If you wonder why there is such cynicism toward government these days, look at the way the SEC is ignoring the majority of citizens on this issue and drag this out until you believe you've worn us down. Seems fair to argue you never intended to listen to the people or the decision to reject Northern Pass would have been done long before now.

Sincerely,
Jerry OConnor
