Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

I believe it's time (past time) for us to invest in renewable, sustainable forms of generating power. Continued use of oil and coal as our primary energy source requires more devastation to the environment in securing and in subsequent accidents. As the requirements for energy grow with our growing world population, we over extend the earth's capacity to regenerate and repair.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Sharon Lester
