Dear Pamela Monroe,

As a residents of New Hampshire we hope the SEC will reject Northern Pass's certificate. Being NH natives we don't want it for some of the following reasons:

1. The huge poles will destroy the pristine New England look we have known all our lives and this will greatly destroy the tourism here.
2. Where the cables are buried it will also destroy the Beautiful NH scenic roads with trees and stone walls ultimately ruining tourism and our history.

3. The health risks for cancer and diseases living in an area where it goes through is not worth any money made, which is very small. Low profit at a high risk!

Please leave NH alone ...once our landscape is gone so will our New England way of life and our tourism. Just like losing many farms to strip malls, you can't take it back once it gone. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission like also will not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.If you need current information about Northern Pass, the posts on Judy's Blog on this website are a good source. <https://www.protectthegranitestate.org/judys-blog/>If you need current information about Northern Pass, the posts on Judy's Blog on this website are a good source.
