September 22, 2017

Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

Further, approving this project would send the message to businesses that eminent domain is available for their use to profit by. Eminent domain was created to allow the greater good of the community to be served by Federal, State and local government agencies to improve communities. This project is the anti-thesis to those worthy goals. It will harm the communities it is used in. Please send the strong message to businesses that in America and especially in New Hampshire we are by the people for the people, communities and our citizens come first. Businesses in Canada and Massachusetts should not be allowed to sacrifice the rights of New Hampshire's citizens for their profits.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Mary Hodgman
