Subject: Construction of Northern Pass will end in blood shed

September 22, 2017

Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

Our state motto is Live Free or Die and New Hampshire citizens will fight construction by any means necessary. Northern Pass will become the nation's new Dakota Pipeline but with blood shed. Is that the publicity YOU want for New Hampshire? Do you really want to have to call in the national guard to fight against armed New Hampshire citizens and have it streamed all over social media and the news?

I hope the committee will reject this project's certificate to prevent it from harming our state and our citizens.

Because if you allow this project to pass all the bloodshed will be on your hands.

Sincerely,
Kelly Hughes
