Dear Pamela Monroe,

As a resident of New Hampshire living on a lake within 200-300 feet of what would be high powered lines, I hope the SEC will reject Northern Pass's certificate.

I am concerned about the larger environmental impact throughout the state, but I am also concerned about the building, laying, and existence of these lines so close to Webster Lake. For health reasons I am also concerned about my family living so close to these lines.

I also believe the best way to meet the energy needs of the future is through more local production (i.e. solar, wind) rather than buying energy from out of the country where much of it will be lost through the wires in transport. Canada's history with tar sands makes me even LESS inclined to want to encourage this kind of wasteful, damaging project.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Laurie Salame
