Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

In the 1800's and 1930's, the beautiful, pristine, primeval forests and land of this state and most of the rest of New England were ravaged and devastated by human greed. Farming, logging and "development" saw no limits to what it would take, without giving in return. The Northern Pass project is just another round of abuse and destruction of our beautiful natural habitats and forests, at a point in history when the forests and lands are rebounding.

Please reject this project's certificate to prevent another wave of irreparable and unsightly destruction to our beautiful State!

Thank you!

Laurie A. Couture

Sincerely,  
Laurie A. Couture
