Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate. This project simply does not make sense for the people and communities of NH, whom I assume is your primary constituency.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. And the transmission line doesn't even serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state. Please focus on the needs of NH residents and on long term sustainable energy sources!

Thank you.

Sincerely,
Katie Moody
