Dear Pamela Monroe,

I strongly oppose the Northern Pass project and believe that it will be detrimental to New Hampshire's tourist industry. My family currently owns five restaurants in New Hampshire and we all oppose this destructive and ugly project. People come to New Hampshire to see trees and lakes; not hideous manmade metal structures protruding from the ground. This project will be a slippery slope and if we allow one company to tear through our landscape, then where does it stop? We need to make an example by saying no to the Northern Pass because the state of New Hampshire is not a power line highway and we will not tolerate this. Many people in New Hampshire feel strongly about this and they also support sustainable energy solutions. This is a step backwards for our state.

Sincerely,
Tara Scullin
