Dear Pamela Monroe,

As a resident of Deerfield and for New Hampshire too please reject Northern Pass's certificate!

This project has far more negatives than positives.

It hurts the values of average peoples' homes (often that is their life's savings). Anyone with common sense knows these new pole structures are nothing like what they are replacing. This project should not move forward at the cost of all these individuals. This is just corporate greed - there are other projects already in the works which makes NP unnecessary and these projects (Vermont and Maine) have worked or closely with those affected to appropriate ends.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. Who is paying for this - NH rate payers? The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you for listening.

Sincerely,
Madelyn Foulkes
