Dear Pamela Monroe,

You know what the Earth is doing for itself to correct all of our mistakes. If we keep corrupting the environment by digging, entrenching, polluting, then we will ALL suffer for it. This isn't about it being easier to supply more people with more electricity. Making things EASIER doesn't make things BETTER. People don't just represent their city or their state or themselves, we represent the ground we stand on, the ground we all LIVE on. And when so many people stand together and keep shouting "Don't do this!" to an action that affects us all, it's imperative that you listen because it's not enough to see things from a political or economic view, but from the perspective of the individual, the person that FEELS deep in themselves that this is wrong. That's where we come in.

With deep respect and understanding,  
Devon Harris
