Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

I support a movement toward renewable energy in New Hampshire and the US in general. I do not believe that Northern Pass should be a part of that movement. The destruction involved with the massive hydro projects in Quebec are not the type of energy that we should be supporting. In addition the destruction caused to the State of NH by the construction of the transmission lines is unacceptable.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,  
Brian Sullivan
