Dear Pamela Monroe,

I'm a long-term Plymouth resident, and I urge the SEC to reject the Northern Pass project as proposed.

Although Plymouth benefits from the proposed project being underground and out of sight through our town, the downtown Plymouth business owners will suffer greatly by this disruption to their customer base, and may not be able to rebound from their loss. There is little need for the power line to run right down our Main Street, when the state approved conduit for projects such as Northern Pass exists along Route 93; only a few hundred yards from our downtown. Furthermore, my family and I are avid hikers and enjoy the beauty of northern New Hampshire. Northern Pass will have a horrible effect on the vistas that we, and thousands of other visitors to our beautiful state enjoy.

I ask once again that the SEC votes down the Northern Pass project.

Thank you for your consideration.

Sincerely,
William Bolton
