Dear Pamela Monroe,

As a resident of New Hampshire, I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project, which raises the question of whether either of the companies has the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire, while not bringing any true benefit to our state. The transmission merely passes through New Hampshire. Ultimately, this will harm our biggest source of income: tourism.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Susan E. Farina
