Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate. I have a house in the North Country where this will have a major impact.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire and it will lower all of our property values. There is no way to get around that. No one wants to see or live near transmission towers! New Hampshire is known for its beauty and you are allowing it to be ruined and for what -- not New Hampshire, we won't benefit. If they union builds the project, there are not enough union workers in NH to support the project and most employees will come from out of state. Stand for New Hampshire and maintain its beauty!!!! You sell us out otherwise.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Holly Forbes
