September 29, 2017

Dear Pamela Monroe,

I work for Eversource and own company stock and am against this project 100%. We do not need to destroy our state and bring in foreign power. How are we supposed to be self sufficient when we are relying on others to provide us something that is so critical to our infrastructure. Not only that but we will be eliminating well paying power plant operator jobs or solar panel installation and maintenance position. Do not take New Hampshire's beauty away so a corporation that only cares about profits can pad their bottom line and give their CEO's bigger and bigger bonuses.

Sincerely,  
Kevin Fortin
