I completely oppose Northern Pass. This is a FOREIGN company who will be taking land in our country to benefit themselves and provide energy for what appears to be a majority of communities in OTHER states. This is not beneficial for NH as a whole. It is not supplying jobs nor is it an adequate, sustainable economic driver in NH. It has virtually NO lasting benefit for NH. It will destroy many beautiful areas of NH, decreasing the tourism value, digging up our National Forest, and will be an ever present eyesore. I live in Plymouth and do not feel that the this project is worth the upheaval it will create in our town. With so many NH residents opposed, how can we let this happen?
