Dear Committee

I am a long-time resident of Merrimack County. I am opposed to the construction of overhead Northern Pass transmission lines through our countryside and cities and towns. These towers and lines will permanently deface our beautiful state. If they cannot be buried in totality, you should disallow the construction project in the best interest of NH residents who will see no benefit from these obtrusive structures. Please consider that your decision in favor of the Northern Pass project will permanently alter the character of our state for the foreseeable future.
