Dear Pamela Monroe,

Use National Grids existing towers to run your new lines. I know it' only \$800,000,000.00 cheaper. Then start on a correct tunnel type (under ground) conduit which you can change out your cables(or add more) as wire technology gets better. Respectfully, Nick Jenkins, Mary Worthen, Eric Worthen, and a lot more Worthens and just about everyone on Peaked Hill Road of Bristol NH. Just about everyone ether republican or democrat and everyone in between. PS I can't believe anyone even thought about this over head route thru NH.

Sincerely,
Nick Jenkins
