Re: Northern Pass

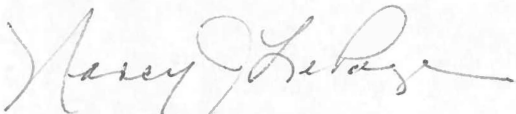

Dear Ms. Monroe,

I am writing today to oppose the approval of the building of Northern Pass, a 192 mile scar through our state. The Eversource proposal would erect huge towers in the beautiful north country, destroying views for miles around. It would clear large swaths of forest for lines buried in the White Mountains, disrupting and destroying wildlife habitat and enjoyment of our national forest, and would have a negative aspect on tourism. It would then erect more monster towers from Ashland to Concord and southward. But the most cynical and disruptive part of this proposal is the route it takes through our towns, the main streets of Franconia, Woodstock and our beautiful, vibrant downtown Plymouth, infringing on the rights of citizens, businesses and their communities. This is unacceptable!

Eversource Energy is offering temporary jobs and questionable tax revenue, not "green" energy, not lower energy costs. The only benefit is to southern New England states, not New Hampshire. There are alternative methods of creating clean, green energy that create jobs and revenue, and transporting it without the permanent destruction of miles of scenic country and small businesses in our downtowns.

I say no to Eversource Energy and NO TO THE NORTHERN PASS!

Respectfully yours,

Nancy J. LePage
