Pamela G. Monroe, Administrator  
21 South Fruit Street, Suite 10  
Concord, NH 03301

Dear Ms. Monroe;

This is my last letter to the SEC regarding Northern Pass. For over three years I and many others have tried to prevent this project that has no benefit for our state. I attended a rally last Tuesday in Plymouth, NH (Oct 17<sup>th</sup>) where representatives from the SEC took a walk around our town and especially down Main Street where NP has a ROW. This little town had well over three hundred people there expressing our views, but not one of the SEC spoke to us on the Common. We all thought that was poor and spoke directly to the fact that we do not feel that we are being heard. You probably know that they plan to tear up the street for at least six months. This would put several businesses into severe financial stress if not put them out of business.

We ask that your committee do your duty and protect the citizens of NH by not approving the NP Project. By now you must know the Hydro Quebec is a bad corporation. The false representations and outright lies presented to our state are so outrageous that this facet should be enough to stop the NP Project. Even DOT told them to resubmit due to the multiple errors and omissions.

Why many citizens in our state that live south of Concord have not voiced their feelings and comments about NP? It may be due to the back yard syndrome or some thing else – apathy. I find this fact very sad that something as important as a for profit, foreign entity could do so much harm to our state. You have heard from many sources why this project is bad for New Hampshire. Do the right thing.

Sincerely,

Gordon A. Rowley
