To Whom it May Concern:

I am 110% opposed to the Northern Pass!!!! As a native of New Hampshire and someone who truly cares about my state, I am having a really difficult time finding any long-term benefits of a project of this magnitude, especially as I continue to do more research.

We all know that this project will disrupt many, many communities in multiple ways, both in an immediate sense and on a permanent basis! Most importantly, it will forever change New Hampshire's amazing landscape so that New Hampshire will not be so amazing forever to come!!

Therefore, it seems pretty asinine to me that someone could even remotely think that this is a good idea when New Hampshire will only reap 10% of the total outputted power. We would be able to replicate that amount of energy and more through alternative green energy sources if we truly needed more power here in this state, and if we truly cared about the immense environmental alteration that this will permanently cause.

Please help to keep our small state big in beauty forever!!!! New Hampshire will win in every way when we pass on the Northern Pass! Thank you.
