Dear Pamela Monroe,

Please do not let Northern Pass move forward. I am quite concerned after months of reading about and trying to understand the Northern Pass project. For someone to say that rather arrogantly that it is "too big to fail" has finally prompted me to write in opposition of this unnecessary project. Aside from the obvious conclusion that there is no gain (or enough for a cup of copy someone has said), and few job opportunities, to the State of New Hampshire, it is high time that everyone involved, including SEC, spend its time and energy on alternatives (of which there are several) that are more conducive to providing power and lower rates for New England.

Best regards,
Stella Walling
