Dear Pamela Monroe,

It is extremely important to the residence of New Hampshire that our voices be heard. We have done everything we can to be heard and yet there are rumors that this project is going to continue above ground. We are open minded and do not want to be obstructionist but we simply cannot abide this. The powerlines for the northern pass project must be buried in order for the project to be except a bowl to the people who must live with it . Please do not approve this project unless the powerlines will be buried.

Very Sincerely,
T. M. Miller
